Effective Term: Fall 2023/Spring 2024/Summer 2024

COURSE PREFIX: ANT 101

COURSE TITLE: General Anthropology

CONTACT HOURS: 3

CREDIT HOURS: 3

RATIONALE FOR THE COURSE:

Anthropology is an unusually broad discipline that studies human cultural, linguistic, and biological diversity as it has developed over time. The course attempts to understand the human condition and human experience as a result of the interaction and intersection of these domains of biology, culture (including past cultural materials and remains) and language. Its ultimate focus is the timeless question "What does it mean to be human?" This includes questions of the place of humans in the natural world, human origins and biological variation, changes in the human condition through time, and understanding the great variety of human societies and cultures, including their language around the world today.

Anthropology is the scientific and humanistic study of humankind around the world and throughout time. It is holistic. Holism refers to the study of the whole of the human condition: past, present, and future; biology, society, language, and culture. There are four subfields in Anthropology: cultural, archeological, biological, and linguistic. Cultural anthropology examines cultural diversity of the present and recent past. Archeology reconstructs past behavior by studying material remains. Biological anthropology examines human fossils, genetics, and bodily growth. They also study non-human primates (monkeys and apes). Linguistic anthropology considers how speech varies with social factors over time. Therefore, General Anthropology is a course that examines a four-field approach to social science: cultural, archeological, biological and linguistic anthropology.

COURSE DESCRIPTION:

This course is the study of physical and cultural anthropology. This course explores subfields of anthropology to examine primatology, human paleontology, human variation, archeology, and ethnology.
