RATIONALE FOR THE COURSE:

Anthropology is a holistic, broad discipline that studies human cultural, linguistic, and biological diversity across time. As the scientific and humanistic study of humankind, its ultimate focus is the timeless question: "What does it mean to be human?" This course examines the human condition through a traditional four-field approach:

- Cultural anthropology examines the cultural diversity of the present and recent past.
- Archaeological anthropology reconstructs past human behavior by studying material remains.
- Biological anthropology examines human fossils, genetics, bodily growth, and non-human primates.
- Linguistic anthropology considers how speech varies with social factors over time.

By exploring the interaction and intersection of biology, language, and culture, this course provides a complete look at the past, present, and future of the human experience.

COURSE DESCRIPTION:

This course is the study of physical and cultural anthropology. This course explores subfields of anthropology to examine primatology, human paleontology, human variation, archeology, and ethnology.
