Part II: Student Learning Outcomes

COURSE LEARNING OUTCOMES and ASSESSMENTS*:

The key characteristics of successful networked-economy firms can be summarized as follows:

- ☒ They do business in intensely competitive markets that have low barriers to entry.
- ☒ Their strategy often involves, but is by no means limited to, significant technological innovations.
- ☒ Increasingly, they interact with their customers via technology.

- ☒ They take advantage of Web tracking technologies to better market and serve their customers.
- ☒ They succeed by leveraging electronic information networks and new-media interfaces—in other words, they derive value from gathering, synthesizing and distributing information.
- ☒ Innovation occurs in “real time” (in response to customer and market demands and insights) rather than in “cycle time” (with methodological and period changes).
- ☒ Resources can easily be shifted to accommodate customer or market demands. (In comparison, old-economy firms are often unable to satisfy significant market demand shifts.)

Learning Outcomes:

- ☒ To create e-commerce strategies
- ☒ Basic technology concepts and the new challenges and opportunities the Internet has brought to companies
- ☒ Ability to use analytical tools in networked-economy markets
- ☒ Demonstrate different types of business models in the networked economy
- ☒ Outline guiding principles behind the design and strategy of the customer web interface
- ☒ Develop traditional and new marketing approaches to create competitive advantage in the networked economy
- ☒ Oversee strategy implementation for the networked economy
- ☒ Outline metrics to measure progress, customer satisfaction and financial performance
- ☒ Oversee the website development process
